

COMPMETRICA Numeric Data Entry Test

The **Numeric Data Entry Test** is designed to assess a candidate's ability to accurately enter specified data onto the system within a specified time period.

The test measures the candidate's accuracy and precision when entering data.

Description

- Candidates are provided with fictitious data forms which must be entered onto computer system within a specified time frame.
- Prior to commencing the exercise, candidates are given a period to practice, before completing the assessment using our online assessment platform.
- The test measures the accuracy and number of characters correctly typed.

Competencies Assessed

Technical and Professional

28. Technical and Professional Skills

Possesses the professional or technical skills required to effectively assume job responsibilities and perform tasks.

Target Clientele

Organizations in which personnel is required to enter numerical data.

Conditions

Duration

- Practice Time: 2 minutes
- Test Time: 18 minutes

Correction Time

- Web Administration: Instant Report

Type of Report

The report presents the results obtained on data entry according to the total number of completed fields, the accuracy of the responses, and the number of correct characters typed per hour. Detailed statistics on the completed fields accompany the evaluation.

A practical test has been included to guarantee that the results will not be affected by equipment-related problems.

Numeric Data Entry Test

Candidate: Smith, John Evaluation date: 2008/05/20

Explanation of the Numeric Data Entry Test

The Numeric Data Entry Test (NUMDET 05) evaluates the ability of the candidate to accurately enter the greatest amount numbers within a timed period. It permits a fair estimate of a person's ability to enter a great deal of data without mistakes. This report presents various results about the data entry, such as the percentage of accuracy, the number of characters typed per hour and the total number of fields completed.

Results obtained

■ Amount of gross characters: <small>(total amount of typed characters)</small>	1 615
■ Amount of net characters: <small>(total amount of characters included in the fields that are correctly filled out)</small>	1 603
■ Accuracy percentage: <small>(net characters/amount of gross characters and amount of characters in the omitted fields)</small>	99,3%
■ Duration of test in minutes:	18:00
■ Amount of gross characters per hour: <small>(estimated amount of characters included in the fields that are correctly filled out per hour)</small>	5 343

DETAILED STATISTICS IN CONFORMITY WITH THE FIELDS THAT ARE FILLED OUT
(Every field with one or many typed characters are considered filled out. The empty fields are also considered filled out when the candidate had to fill them out.)

■ Total amount of fields that are filled out:	286
↳ Amount of empty fields:	0

		SIMPLE (1 to 5 char.)	MODERATE (6 to 9 char.)	HIGH (10 or more char.)
Fields - Amount	Amount filled out	142	108	36
	Successful amount	140	107	36
	Accuracy percentage	99%	99,1%	100%
