Typing Test

Candidate: Smith, John Evaluation date: 2008/05/20

Explanation of the Typing Test

The Typing Test (TYPING-AT 06) is designed to evaluate a person's capacity to type a text with precision and speed within a timed period. It permits a fair estimate of a person's capacity to seize a great number of data without any errors. The report presents various results with regards to the typing capacity, such as the number of errors, the percentage of precision as well as the number of characters and words typed per hour.

Results obtained

Duration of test in minutes:	11:04	
Total number of words typed:	433	
Total number of errors:	0	
Accuracy percentage:	100%	
Gross typing speed:	Words / minute	Characters / hour
	39	12 828
The gross typing speed corresponds to the number of words typed per minute without taking errors into account. It is also shown as the number of characters typed per hour.		
Net typing speed :	39	12 828
The net typing speed corresponds to the number of words correctly typed per minute. It is also shown as the number of characters typed per hour.		

INFORMATION RELATING TO THE TYPES OF ERRORS:

Number of missing words:	0
Number of extra words:	0
Number of linked words (space missing to separate two words):	0
Number of separated words (space separating a word in two):	0
Number of spelling mistakes:	0
Number of inversion errors (words typed in the wrong order):	0
